

## EHS and Lab Specific Training for Lab Staff

Below is a summary of lab related training as well as examples of laboratory positions that typically require each training. This is not an exhaustive list of recommended trainings nor covered positions as research labs typically have multiple unique hazards. If you or your supervisor have questions on whether or not a particular training is required for your position, contact the Laboratory Safety Officer with any questions.

Training Class Summary	Affected Positions	Cost
<b>UO Fire Protection in Labs Training:</b> Includes fire protection systems, emergency response, fire extinguishers and use, fire safety best practices	PIs, GEs, undergraduate, and	No
<b>Laboratory Safety Training:</b> Includes an overview of common laboratory hazards, OSHA requirements, and GHS labeling of chemicals. <b>Annual refresher</b> required & includes updates to OSHA to GHS guidelines within the last year.	PIs, GEs, undergraduate, and professional lab staff	No
<b>Bloodborne Pathogens Online Training:</b> Includes information on specific pathogens, modes of transmission, PPE, terminology, disinfection techniques, and waste disposal. Meets OSHA BBP Standard.	Lab members with possible exposure certain human materials	No
<b>Biosafety Level 2 Training:</b> Includes information of minimizing exposure to, and accidental release of, biohazardous materials. This training is not a requirement but is advised.	Lab members in BSL2 research labs	No
<b>Hazardous Waste Management Training:</b> Provides information of State, federal, and UO rules on hazardous waste handling, collection, and disposal.	Lab members that generate or handle	No
<b>Laser Safety Training:</b> Based on the American National Standard for Safe Use of Lasers (ANSI Z136.1-2007). The program's intent is to ensure the safe use of lasers in research and academics.	Lab members that fall under UO Laser Safety Program	No
<b>Radiation Safety:</b> This two-hour class will provide a basic understanding of radiation safety principles and practices and explain University procedures for research that uses radioactive materials.	Lab members working with radioisotopes	No
<b>Respiratory Protection:</b> This class covers the basics about the Respiratory Protection Program, including responsibilities, program functions, and how to obtain, care for, and use a respirator.	Lab members that utilize respirators	No
<b>Shipping Dangerous Goods:</b> Required for shipping materials regulated as Dangerous Goods (49 CFR Part 172 and IATA). This includes listed materials, and unlisted materials with hazardous properties, pathogenic biological materials and dry ice.	PIs and lab members who ship these materials	No
<b>Animal Occupational Health Training:</b> Addresses zoonotic and allergen risks. Training is online; for UO employees, students, volunteers and unpaid interns. Contact Animal Welfare Services for enrollment.	Individuals working with research animals.	No
<b>CPR, AED, First Aid:</b> Medic First Aid CPR, AED, and First Aid classes are offered only to university faculty and staff when required by position description.	See position description for requirements	Yes
<b>Lab Specific Training (non-EHS):</b> Training is given by knowledgeable lab staff to incoming members to provide safety related information specific to the research laboratory.	All laboratory members	No
<b>Lab Specific SOP Training (non-EHS):</b> High hazard/highly specialized work requires written SOPs. New lab members who will use written SOPs need to be trained by a competent lab member.	Lab members using written SOPs for their work	No
