

IMT COVID-19 Objectives: as of August 24, 2021

*Omicron addition January 2022

- 1.) Implement and maintain public health strategies known to reduce the impacts of COVID-19 illness and allow the university to conduct in-person instruction, research operations, and campus residential/student life activities as safely as possible. These include:
 - (A) Requiring vaccination status reporting among the university community and establishing systems for members of the university community to maintain their vaccinated status.
 - (B) Maintaining comprehensive testing and contact tracing programs for the university, to the extent possible during Omicron surge and in partnership with Lane County Public Health and Oregon Health Authority for the duration of the public health emergency.
 - (C) Implementing safety and health regulations based on the latest developments and guidance from the local public health authority, Oregon Health Authority, and CDC.
- 2.) Continue to encourage personal responsibility to help reduce risk and protect the self and others.
- 3.) Keep the campus informed of new developments, local public health authority, Oregon Health Authority, and CDC guidance.
- 4.) Document the financial impacts of the COVID-19 illness on the university's operations and protect its long-term financial stability.

Policy Group
The IMT Policy Group provides direction in making strategic policy decisions for COVID-19 impacts on the university's ability to meet its mission of teaching, research, and public service. The Policy Group advises the President and Provost.

Haily Griffith

Lane County COVID-19 Response Coordination
Since the onset of the SARS-CoV2 pandemic, Lane County has taken an integrated and collaborative approach to response. Institutional partners that include senior hospital leadership, the UO IMT leadership, Lane County government, and the county's municipalities have coordinated a response that has protected our regional hospital capacity throughout surges.
